MN Carport

s Polikarbonatno streho | with Polycarbonate Roof | avec toit en Polycarbonate

Gradnja, prilagojena za kombiniranje s prostorom za shranjevanje
| Construction Adapted for Attaching a Storage Room
| Construction adaptée à l'installation d'un espace de rangement

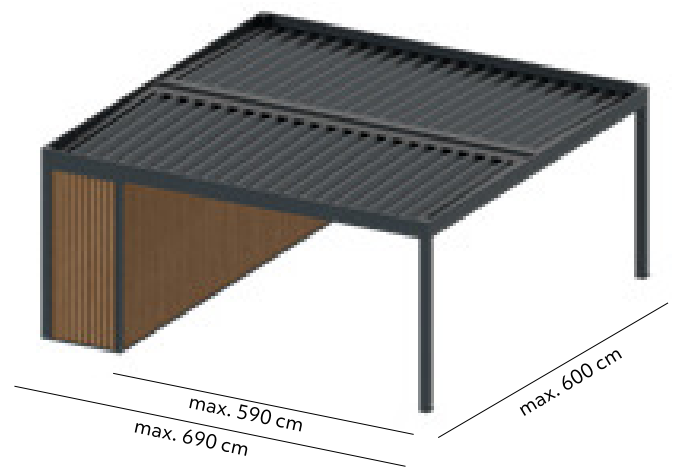

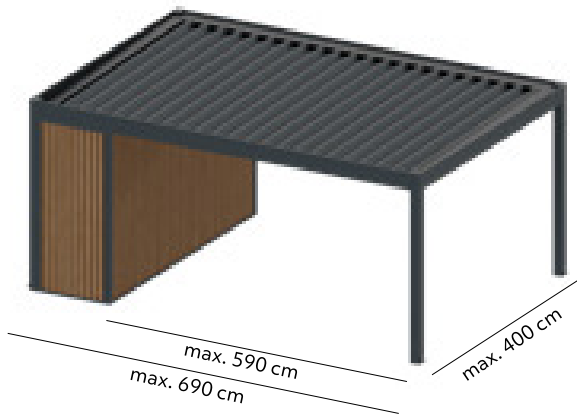

Nadstrešek za avto s polikarbonatno streho je odlična rešitev, ki ne le učinkovito ščiti avto pred vremenskimi vplivi, temveč omogoča tudi dostop do naravne sončne svetlobe in hkrati ščiti pred UV-sevanjem. Kombinacija nadstreška za avtomobile s s prostorom za shranjevanje poveča njegovo funkcionalnost, saj omogoča shranjevanje orodja, vrtno opreme, koles ali avtomobilskih dodatkov.

A carport with a polycarbonate roof is the perfect solution that not only effectively protects the car from weather conditions but also provides access to natural sunlight while protecting against UV radiation. Equipping the carport with a storage room enhances its functionality, allowing for the storage of tools, garden equipment, bicycles, or car accessories.

Le carport avec un toit en polycarbonate est une solution idéale qui protège efficacement la voiture des conditions météorologiques. Il offre un accès à la lumière naturelle du soleil, tout en protégeant contre les rayons UV. L'équipement d'un espace de rangement au carport augmente également sa fonctionnalité en permettant le stockage d'outils, d'équipements de jardin, de vélos et d'accessoires automobiles.

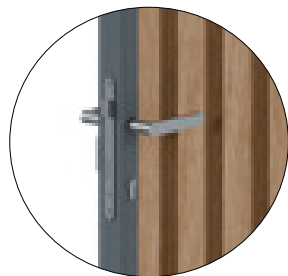

Ključne lastnosti | Key features | Caractéristiques principales

- Zaščita pred vremenskimi vplivi in UV sevanjem
- Dostop do naravne sončne svetlobe
- Velikost prilagodljiva individualnim potrebam
- Vključitev shrambe v konstrukcijo nadstreška za avtomobile omogoča ohranjanje estetske privlačnosti domačega okolja
- Protection against weather conditions and UV radiation
- Access to natural sunlight
- Size Adjustable to individual needs
- Integrating the storage room into the carport structure allows for maintaining the aesthetic appeal of the home environment
- Protection contre les conditions météorologiques et les rayons UV
- Accès à la lumière naturelle lie du soleil
- Possibilité d'adapter la taille selon les besoins individuels
- L'intégration de l'espace de rangement dans la structure du carport permet de maintenir l'esthétique de l'environnement de la maison

Droite/Gauche
Porte sans seuil
Dimension fixe 90x200 cm
Superstructure de la porte: hauteur adaptée à l'espace libre
Ouverture vers l'intérieur/extérieur
Fermeture: verrou avec insert

MN Nadstreški Fix

s Polikarbonatno streho | with Polycarbonate Roof | avec toit en Polycarbonate

Konstrukcija, prilagojena za vgradnjo steklene strehe
| Construction Adapted for Glass Roof Installation
| Construction adaptée à l'installation d'un toit en verre

MN Nadstreški Fix je strešna kritina, ki zagotavlja veliko sončne svetlobe. Za polikarbonatno streho so značilni visoka prepustnost za svetlobo, toplotna izolacija in zaščita pred UV-sevanjem.

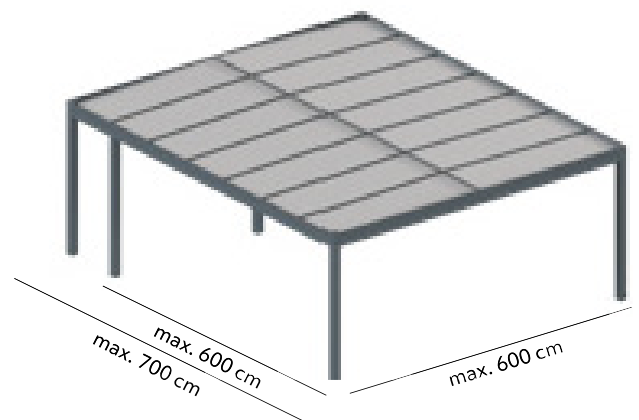

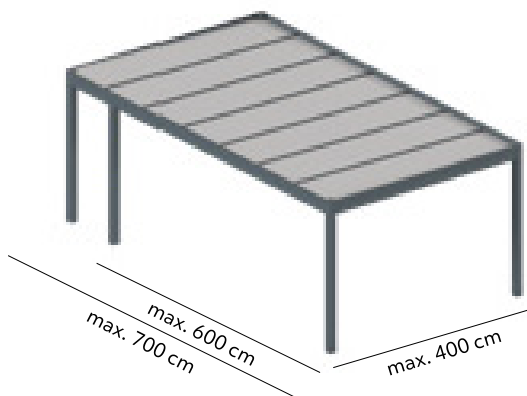

Okvir konstrukcije je prilagojen tudi za vgradnjo steklene strehe. Zaradi prozorne strehe je prostor svetlejši, vizualno povečan in dobi bolj odprt značaj.

MN Nadstreški Fix is a roofing that guarantees a constant sunlight in-flow. The polycarbonate roof is characterized by high light permeability, thermal insulation, and protection against UV radiation. The frame of the structure is also adapted for the installation of a glass roof. The transparent roof makes the space brighter, visually enlarged, and gives it a more open character.

Le MN Nadstreški Fix est une couverture qui garantit un flux constant de lumière solaire. Le toit en polycarbonate se caractérise par une grande perméabilité à la lumière, une isolation thermique et une protection contre les rayons UV. Le châssis de la construction est également adapté à l'installation d'un toit en verre. Le toit transparent rend l'espace plus lumineux, optiquement agrandi et lui confère un caractère plus ouvert.

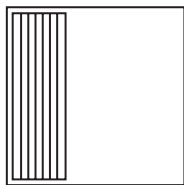

Ključne lastnosti | Key features | Caracteristiques principales

- Optični učinek povečanja prostora
- Zagotavlja prodor naravne svetlobe, ohranja svetlost in toploto v prostoru brez ogrevanja
- Odpornost na vremenske vplive
- Ponuja možnosti prilagajanja in dekoracije, kar omogoča prilagoditev videza individualnim potrebam in estetiki prostora
- Optical enlargement effect of the space
- Provides penetration of natural light, maintaining brightness and warmth in the room without excessive heating
- Resistance to weather conditions
- Offers customization and decoration possibilities, allowing for adjusting the appearance to individual needs and the aesthetics of the space
- Effet d'agrandissement optique de l'espace
- Assure la pénétration de la lumière naturelle, maintenant la luminosité et la chaleur dans la pièce sans surchauffe excessive
- Résistance aux conditions atmosphériques
- Offre des possibilités de personnalisation et de décoration, permettant d'ajuster l'apparence aux besoins individuels et à l'esthétique de l'espace.

Enokapnica
| Single-pitched roof | Toit a une pente

Dvokapnica
| Double-pitched roof | Toit a deux pentes

Fiksni stenski panel / Fiksni stropni panel
| Fixed Wall Panel / Fixed Ceiling Panel
| Panneau fixe mural / Panneau fixe de plafond

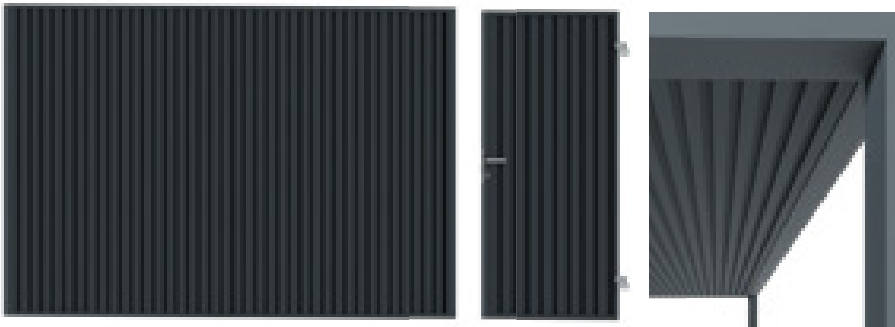

Fiksna stenski panel je vsestranski izdelek, ki se lahko uporablja kot delna ali popolna obloga za stene. Isto panel je mogoče namestiti pod polikarbonatno steklo. Njen glavni namen je zagotoviti zaščito pred intenzivno sončno svetlobo, vetrom in dežjem. Ponuja delno senčenje, kar je še posebej pomembno na območjih, kjer se lahko prozorna streha na soncu segreje. Plošča ustvarja edinstven vizualni učinek, zlasti v kombinaciji z LED razsvetljavo.

The fixed wall panel is a versatile product that can be used both as partial and complete enclosure for the construction walls. The same panel can be installed on the roof under polycarbonate/glass. It's main purpose is to provide protection against intense sunlight, wind, and rain. It offers partial shading, which is particularly important in areas where a transparent roof can heat up in the sun. The panel creates a unique visual effect, especially when combined with LED lighting.

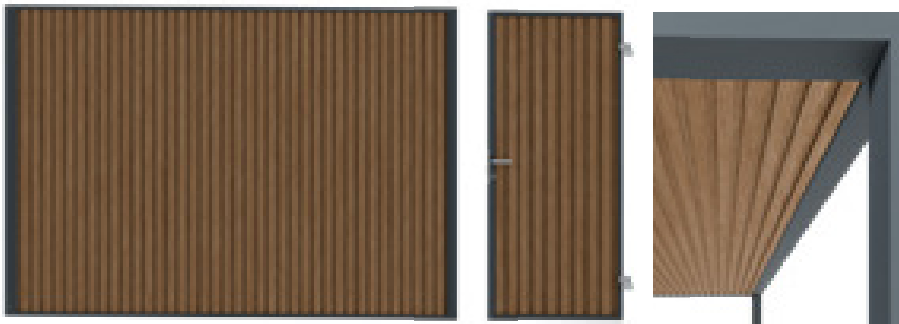

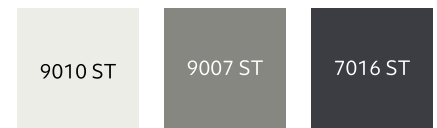

Le panneau fixe mural est un produit polyvalent qui peut être utilisé aussi bien comme revêtement partiel que complet pour les murs d'une structure. Ce même panneau peut également être monté sur le toit sous du polycarbonate/verre. Sa principale fonction est de protéger contre l'intensité du soleil, le vent et la pluie. Il offre une ombre partielle, ce qui est particulièrement important dans les endroits où un toit transparent peut chauffer au soleil. Le panneau crée un effet visuel unique, surtout lorsqu'il est combiné avec un éclairage LED.

Ključne lastnosti | Key features | Caracteristiques principales

- Lahko se uporablja kot delno ali celotno stransko ohišje in stropni panel
- Izdelan iz visokokakovostnega aluminija
- Na voljo v široki paleti barv po RAL lestvici ali imitacijo lesa
- Zagotavlja zaščito pred intenzivno sončno svetlobo, vetrom in dežjem
- Enostavno vzdrževanje
- Can be used as partial or complete side enclosure and ceiling panel
- Made of high-quality aluminum
- Available in a wide range of RAL colors or wood-like finishes
- Provides protection against intense sunlight, wind, and rain
- Easy to maintain, no time-consuming maintenance
- Peut être utilisé comme revêtement partiel ou complet pour les côtés et le plafond
- Fabriqué en aluminium de haute qualité
- Disponible dans une large gamme de couleurs RAL ou dans des finitions similaires au bois
- Assure une protection contre l'intensité du soleil, le vent et la pluie
- Facile à entretenir, ne nécessite pas d'entretien chronophage

Opis produkta

Product description

SI

MN Carport je inovativna rešitev za zaščito vašega vozila. Gre za aluminijasto, fiksno streho, ki ščiti vaš avto pred soncem, dežjem, vetrom in snegom. Minimalistična oblika, estetsko privlačen zaključek, brez vidnih pritrdilnih elementov in izbira barv omogočajo, da se Carport prilega v vsako okolje.

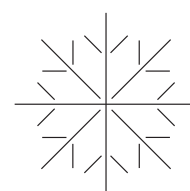

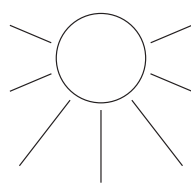

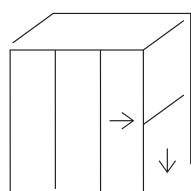

Nadstrešek lahko zaradi konstrukcije iz aluminija služi tudi kot nadstrešek na terasi. Zahvaljujoč inovativni tehnologiji lahko nadstrešek za teraso po želji opremite s podstreho iz tkanine in celo s svetlobnimi trakovi LED ter infrardečim grelnikom. Če želite vrtno pohištvo in drugo opremo zaščititi pred slabimi vremenskimi razmerami, se splača odločiti za screen roloje ali zasteklitev. Imeli boste funkcionalen prostor, v katerem boste lahko preživljali čas ob kateremkoli letnem času ali času dneva.

EN

The MN Carport is a modern parking space. It is a solid, fixed roofing that protects your car from the sun, rain, wind and snow. The minimalist form, aesthetically pleasing finish, with no visible fixings and a choice of colours allows the Carport to fit into any environment.

MN Carport = MN Nadstreški Fix

The carport structure can be successfully used as a standard terrace roofing. In this option, we recommend adding a lower roof in the form of an aesthetically pleasing fabric and equipping the structure with LED lighting and infrared heaters. If you want to cover yourself, your furniture and accessories, it is worth choosing side Shutters, ZIP blinds or glazing. You will gain a functional space to spend time at any time of the day or even year.

Nadstrešek za vozila s fotovoltaičnimi paneli

Carport with photovoltaic panels

Fiksna streha omogoča namestitvev fotovoltaičnih panelov in uporabo pridobljene električne energije za napajanje gospodinjstkih aparatov ali polnjenje električnega avtomobila.

The fixed roof will provide the opportunity for the installation of photovoltaic panels and the use of the resulting electricity to power household appliances or to charge an electric car.

Streha s fotovoltaičnimi paneli

Roof with photovoltaic panels

Streha brez fotovoltaičnih panelov

Roof without photovoltaic panels

Podstreha iz tekstila (izbirno)

Bottom roof - fabric (option)

Kot dodatno možnost je mogoče naročiti podstreho, ki pokriva od spodaj vidno strešno pločevino. Spodnja stran strehe je izdelana iz estetsko elegantne tkanine z nosilci, v katere je mogoče vgraditi LED trakove.

As an additional option, a bottom roof can be ordered to cover the exposed roof sheet visible from below. The underside of the roof is then made of an aesthetically elegant fabric with beams in which LED Strip lights can be fitted.

JuiceBox Pro Available in 22 kW, 32A, and 3-phase power level. It has a Demand Limitation Pro feature that allows charging at the maximum available power without exceeding it.

Fotovoltaični paneli

Photovoltaic panels

SI

Pravokotna streha omogoča, da je velikost fotovoltaičnih panelov prilagoditi vašim potrebam. Glede na izbrane dimenzije konstrukcije se izbere ustrezne dimenzije fotovoltaičnih panelov.

EN

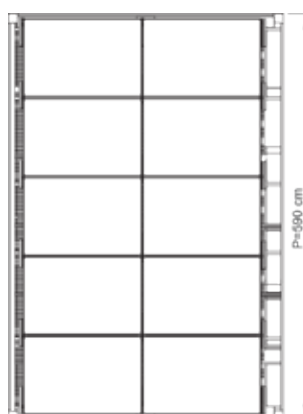

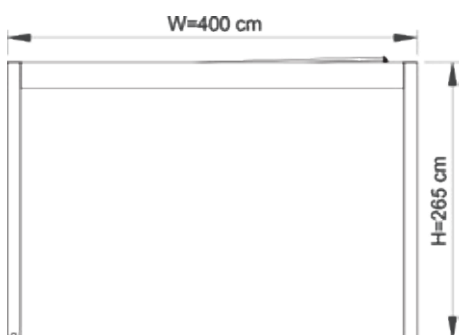

MN Carport is a tailor-made roof. The photovoltaic panels, which have their own fixed dimensions, define a specific framework, but the trapezoidal sheet metal roof underneath makes it possible to adapt the size of the Carport to the investor's needs. Depending on the chosen dimensions of the structure, the appropriate panel packages are selected.
